SKILLS

- **Programming Languages** : C, Java, Python
- **AI / LLM (Building)**: Gemini API, LLM Integration, Prompt Engineering, RAG (*in progress*)
- **Frameworks and Libraries**: Android SDK, XML, Django, REST API's, React.js, Next.js
- **CS Fundamentals** : Object-Oriented Programming, Data Structures and Algorithms
- **Database Management**: MySQL, SQLite, Firebase, PostgreSQL
- **Web Technologies**: HTML, CSS, JavaScript, Bootstrap, Tailwind CSS
- **Version Control**: Git, GitHub

EXPERIENCE

My Role: Personal Project | NOVA – LLM-Powered Chatbot [Currently Working]

AI Chatbot [Gemini API | Django REST Framework | React (Vite) | LLM Integration]

Building an LLM-powered chatbot with a Django REST Framework backend integrating the Gemini API, and a React (Vite) frontend, architected for both web and Android platforms. Designed as an LLM-agnostic system following a structured roadmap — basic chatbot → RAG (Retrieval-Augmented Generation) → LangChain → AI Agents — to progressively add document Q&A and tool-calling capabilities.

My Role: Intern - Part-time Android Developer *Uni Soft Corner*

• Enterprise Saving Circle App [Java | XML | Firebase | Razorpay SDK | Material Design]

Developed an Android app with multi-role authentication, real-time Firebase synchronization, and Razorpay integration for secure subscription payments. Optimized UI using Material Design, RecyclerView, and animations for dynamic data visualization.

My Role: Freelance Lead Developer | Client: M.G.P.G. College Roorkee

• CFM – College Fee Management System *Django / Python / MySQL / SMTP Email Bootstrap*

Developed a multi-college fee management web platform with role-based login for Super Admin, College Admin, Accountant, and Clerk. Implemented multi-college access control, automated fee processing, and email receipt notifications using SMTP. Designed secure CRUD operations for students, courses, and fee records with Django ORM and optimized dashboards for each user role.

PROJECT

• POS Billing System | Python | Django | Bootstrap | JavaScript

Built a mobile-responsive Point of Sale system with dual barcode scanning (hardware + camera), GST-compliant invoicing, and flexible customer management. Features include automated tax calculations, category-based inventory, discount management, and comprehensive reporting dashboard.

EDUCATION

• Bachelor of Technology (B.Tech)

Institute of Technology Roorkee, India [May 2022 – September 2026]

CERTIFICATES AND ACHIEVEMENTS

- Advanced Java Programming & OOP Concepts - Uni Soft Corner.
- Data Structures & Algorithms Specialization - Completed advanced coursework.
- C language course from- Uni Soft Corner
- Python language course from-Uni Soft
